## PRC-010 Under Voltage Load Shed Program

### ID #2021-009

Information documents are not authoritative. Information documents are for information purposes only and are intended to provide guidance. In the event of any discrepancy between an information document and any authoritative document<sup>1</sup> in effect, the authoritative document governs.

#### 1 Purpose

This information document relates to the following authoritative document:

- reliability standard PRC-010-AB-2, *Under Voltage Load Shedding* (“PRC-010”).

The purpose of this information document is to provide an update on the under voltage load shed program, referenced in requirements R2 and R7 of PRC-010. The AESO has completed its analysis of the periodic operations planning studies and determined that no under voltage load shed program is required in Alberta at this time.

#### Revision History

<sup>1</sup> “Authoritative document” is the general name given by the AESO to categories of documents made by the AESO under the authority of the *Electric Utilities Act* and associated regulations, and that contain binding legal requirements for either market participants or the AESO, or both. Authoritative documents include the ISO rules, the reliability standards, and the ISO tariff.
