

Stakeholder Comment Matrix – April 9, 2020

Overview of Short-term Market Implementation Requirements for Energy Storage Participation

Period of Comment: April 9, 2020 through April 27, 2020	Contact: [REDACTED]
Comments From: RMP Energy Storage Inc.	Phone: [REDACTED]
Date: [2020/04/27]	Email: [REDACTED]

Instructions:

1. Please fill out the section above as indicated.
2. Please respond to the questions below and provide your specific comments.
3. Email your completed comment matrix to energystorage@aeso.ca by April 27, 2020.

The AESO is seeking comments from Stakeholders with regard to the following matters:

	Questions	Stakeholder Comments
1.	Are there areas where further clarity on expected participation would be helpful?	The section on AOR would benefit from an example specifically regarding proper procedure if an asset hits 100% or 0% state of charge prior to a dispatch interval or if a T-1 bid would result in 100% or 0% during the interval due to dispatch in the current interval.
2.	Are there areas of market participation that in your view need special consideration for energy storage that are not identified in the overview document?	
3.	Additional comments	Treating ES as a firm load customer including DTS treatment remains the most significant barrier for ES to participate in all markets, for the full value of ES to be realized by the grid and increases transmission build where unnecessary.

Thank you for your input. Please email your comments to: energystorage@aeso.ca .
