CURRENT YEAR MONTHLY DETAIL

2019 Third Quarter Calibration Factor % = Carryforward Dec 31, 2018 + [(Cost of Losses – Loss Revenues) - Rider E Revenues] Jan 1 - Dec 31, 2019

[Hourly Loss Factor Customer Volumes × Hourly Pool Price] Jul 1 - Dec 31, 2019

The following table provides a summary of the AESO's projected year-end losses account balance for Rider E for January to December 2019.

			Calibration Factor Calculation Inputs						Other Information

tal Balance						(1.5)	2,186.85				
Calibration Factor Calculation Outputs: Rider E Calibration Factor Q3 2019							(0.07%) (Re	fund)/Charge			

Notes:

- 1. The Rider E Calibration Factor will apply to all loss factor customers receiving service under Rates STS, DOS, XOS, and IOS as provided on the Rider E rate sheet.
- 2. If the Rider E Calibration Factor for Q3 remained in place during Q3 and Q4, it would collect the variance between cost of losses and revenues by the end of 2019, as currently forecasted.
- 3. Forecast amounts in the above table and calculation reflect the AESO's best estimates at the time of preparation. The values represent forecasts and estimates only, and final values will differ.
- 4. Actual amounts in the above table are subject to revision in future periods due to interim and final settlement and to other adjustments.
- 5. The calibration factor calculation itself is based on summing hourly costs, revenues, and loss factor customer volumes x pool price, and the same result will not be obtained by using the monthly values presented.
- 6. Numbers may not add due to rounding.
- 7. "NA" means "not applicable".
- 8. The revenue, cost and Rider E amounts are shown on a production month basis.

PRIOR YEARS MONTHLY DETAIL

The following table provides a summary of the AESO's losses account balance for Rider E for the period 2006 to 2018.
