

ISO Rules

Part 500

Division 502 Technical Requirements

Section 502.4 Automated Dispatch and Messaging System

External Consultation Draft
July 16, 2020

Applicability

- 1 Section 502.4 applies to:
 - (a) a **pool participant** who may receive a **dispatch** or a **directive** through the energy market or **ancillary services** market.

Automated Dispatch and Messaging System

- 2 A **pool participant** must have an Automated Dispatch and Messaging System at each location at which the **pool participant** may receive a **dispatch** or a **directive** through the energy market or the **ancillary services** market.

Operating Requirement

- 3 A **pool participant** must continuously operate its Automated Dispatch and Messaging System in accordance with **good electric industry practice**.

Revision History

Date	Description
yyyy-xx-xx	Removed all Voice Communication requirements and moved into 502.17. Removed New and Existing System requirements and Successor requirements.
2015-03-27	Replaced "effective date" with the initial release date in sections 2(1), 2(2) and 3; and replaced the word "Effective" in the Revision History to "Date".
2014-07-02	Unbolded the reference to "outage" in Appendix 1.
2013-01-08	Appendix added containing authoritative system availability requirements specified in Table 2 of ISO OPP 003.2. Previously defined terms have been un-defined and so the words have been unbolded.
2011-06-01	Initial release
