

# Transmission Modelling Data Form

Control System

Project Number and Energization; or Facility Code:

## Control Data

Conducting Equipment

*In-service*

Manufacturer

Control System

Model

| Data Name | Description | Value | Data Name | Description | Value |
|-----------|-------------|-------|-----------|-------------|-------|
|           |             |       |           |             |       |
|           |             |       |           |             |       |
|           |             |       |           |             |       |
|           |             |       |           |             |       |
|           |             |       |           |             |       |
|           |             |       |           |             |       |
|           |             |       |           |             |       |
|           |             |       |           |             |       |
|           |             |       |           |             |       |

Data submitted in this engineering document represents the electrical system components to a level adequate for powerflow, short-circuit, and dynamic modeling of:

- An operational facility or a project passing
- Gate 1
- Gate 2
- Gate 3
- Gate 5

of the AESO project process, and is subject to change as project design proceeds and as-built data becomes available. It is not to be relied upon for construction.
