Dear Market Participants and Interested Parties:

Re: **Letter of Invitation to Participate in AESO Consultation on proposed New Section 502.10 of the ISO rules, *Revenue Metering Technical Requirements*, to replace the *AESO Measurement System Standard***

The AESO invites market participants and interested parties to express their interest participating in an industry technical workgroup (“WG”) to assist in developing proposed new Section 502.10 of the ISO rules, *Revenue Metering Technical Requirements* (“New Section 502.10”), which will replace the expired yet currently referenced *AESO Measurement System Standard*. The WG will identify the minimum technical requirements for revenue metering systems and the associated metering data submissions to be included in proposed New Section 502.10.

For more information about the WG, please refer to the draft Terms of Reference.

The AESO will select WG participants based on their level of technical knowledge or the fact that they hold direct responsibility for revenue metering systems within their organizations. Each participant must be willing to work collaboratively with the AESO and other WG members. Interested individuals should respond to Jane Wu at [jane.wu@aeso.ca](mailto:jane.wu@aeso.ca) by **October 28, 2016**.

The AESO will review these responses and will send invitations to selected participants in advance of the first WG meeting, which is expected to be held in January 2017.

The AESO thanks market participants and interested parties for their participation in this initiative.

Yours truly,
