Instructions:

1. Please fill out the section above as indicated.
2. Please refer back to the *Letter of Notice for Feedback on the Content of Proposed Options for Amended Section 505.2* under the “Related Materials” section to view the actual draft proposed materials on amended Section 505.2.
3. On the sections of the rule listed below, please provide your specific comments, proposed revisions, and reasons for your position underneath (if any). Blank boxes will be interpreted as favourable comments.
4. Please be advised that general comments do not give the AESO any specific issue to consider and address, and results in a general response.

Question	Stakeholder Comments
<p>Refund of Generating Unit Owner’s Contribution</p>	
<p>2 The ISO must calculate a refund for each calendar year during the refund period as:</p> $\text{refund} = \text{annual amount} \times \text{availability assessment}$ <p>where:</p> <p>(a) annual amount is as specified in the ISO tariff; and</p> <p>(b) availability assessment is calculated in accordance with subsection 3, 4, or 5, as applicable.</p>	<p>No comments</p>

Question	Stakeholder Comments								
<p>Availability Assessment for Generation With Energy Market Offers</p> <p>3 Subject to subsections 4 and 5, the ISO must calculate the availability assessment for a generating unit or an aggregated generating facility that submits offers for energy as follows:</p> <ul style="list-style-type: none"> (a) identify cumulative time-weighted hourly availability using the available capability of the generating unit or aggregated generating facility in relation to its critical maximum capability; (b) calculate the average hourly availability by dividing the value determined in subsection 3(a) by the number of hours in the year; and (c) determine the availability assessment for the generating unit or aggregated generating facility based on the average hourly availability as follows: <table border="1" data-bbox="94 813 1136 1127"> <thead> <tr> <th data-bbox="94 813 491 919">Average Hourly Availability [subsection 3(c)]</th> <th data-bbox="491 813 1136 919">Availability Assessment</th> </tr> </thead> <tbody> <tr> <td data-bbox="94 919 491 974">Less than 0.60</td> <td data-bbox="491 919 1136 974">0%</td> </tr> <tr> <td data-bbox="94 974 491 1071">0.60 to 0.80</td> <td data-bbox="491 974 1136 1071">$\frac{\text{average hourly availability} - 0.60}{0.20} \times 100\%$</td> </tr> <tr> <td data-bbox="94 1071 491 1127">Greater than 0.80</td> <td data-bbox="491 1071 1136 1127">100%</td> </tr> </tbody> </table>	Average Hourly Availability [subsection 3(c)]	Availability Assessment	Less than 0.60	0%	0.60 to 0.80	$\frac{\text{average hourly availability} - 0.60}{0.20} \times 100\%$	Greater than 0.80	100%	<p>The proposed changes to the GUOC formula are an improvement over the current rule. The proposed revision appears acceptable.</p>
Average Hourly Availability [subsection 3(c)]	Availability Assessment								
Less than 0.60	0%								
0.60 to 0.80	$\frac{\text{average hourly availability} - 0.60}{0.20} \times 100\%$								
Greater than 0.80	100%								
<p>Availability Assessment for Renewable Generation and Generation with a Maximum Capability Less than 5 MW</p>									
<p>4 The ISO must calculate the availability assessment for a wind, solar, or run of river hydroelectric generating unit or an aggregated generating facility, an aggregated asset containing a wind, solar or run of river generating unit or aggregated generating facility, and a generating unit or aggregated generating facility with a maximum capability less than 5 MW, as follows:</p>	<p>No Comments</p>								

Question	Stakeholder Comments																
<p>(a) identify the cumulative time-weighted hourly availability using the metered energy of the generating unit or aggregated generating facility, less any volumes dispatched for operating reserve, in relation to its critical maximum capability;</p> <p>(b) calculate average hourly availability by dividing the value determined in subsection 4(a) by the number of hours in the year; and</p> <p>(c) subject to subsection 4(d), determine the availability assessment for the generating unit or aggregated generating facility based on the average hourly availability as follows:</p> <table border="1" data-bbox="96 662 1121 935"> <thead> <tr> <th>Average Hourly Availability [subsection 4(c)]</th> <th>Availability Assessment</th> </tr> </thead> <tbody> <tr> <td>Less than 0.15</td> <td>0%</td> </tr> <tr> <td>0.15 to 0.25</td> <td>$\frac{\text{average hourly availability} - 0.15}{0.10} \times 100\%$</td> </tr> <tr> <td>Greater than 0.25</td> <td>100%</td> </tr> </tbody> </table> <p>(d) determine the availability assessment for a solar aggregated generating facility based on the average hourly availability as follows:</p> <table border="1" data-bbox="126 1042 1125 1321"> <thead> <tr> <th>Average Hourly Availability [subsection 4(c)]</th> <th>Availability Assessment</th> </tr> </thead> <tbody> <tr> <td>Less than 0.08</td> <td>0%</td> </tr> <tr> <td>0.08 to 0.12</td> <td>$\frac{\text{average hourly availability} - 0.08}{0.04} \times 100\%$</td> </tr> <tr> <td>Greater than 0.12</td> <td>100%</td> </tr> </tbody> </table>	Average Hourly Availability [subsection 4(c)]	Availability Assessment	Less than 0.15	0%	0.15 to 0.25	$\frac{\text{average hourly availability} - 0.15}{0.10} \times 100\%$	Greater than 0.25	100%	Average Hourly Availability [subsection 4(c)]	Availability Assessment	Less than 0.08	0%	0.08 to 0.12	$\frac{\text{average hourly availability} - 0.08}{0.04} \times 100\%$	Greater than 0.12	100%	
Average Hourly Availability [subsection 4(c)]	Availability Assessment																
Less than 0.15	0%																
0.15 to 0.25	$\frac{\text{average hourly availability} - 0.15}{0.10} \times 100\%$																
Greater than 0.25	100%																
Average Hourly Availability [subsection 4(c)]	Availability Assessment																
Less than 0.08	0%																
0.08 to 0.12	$\frac{\text{average hourly availability} - 0.08}{0.04} \times 100\%$																
Greater than 0.12	100%																

Question	Stakeholder Comments								
<p>Availability Assessment for Behind the Fence Generation with Net Offers</p> <p>5 The ISO must calculate the availability assessment for a site with 1 or more onsite generating units or aggregated generating facilities that supplies electric energy for 1 or more onsite load assets and offers excess generation to the energy market on a net basis as follows:</p> <ul style="list-style-type: none"> (a) identify the cumulative time-weighted hourly availability using the available capability of the site in relation to the site’s Rate STS contract capacity; (b) calculate average hourly availability by dividing the value determined in subsection 6(a) by the number of hours in the year; and (c) determine the availability assessment for the site based on the average hourly availability as follows: <table border="1" data-bbox="121 813 1129 1096"> <thead> <tr> <th data-bbox="121 813 520 911">Average Hourly Availability [subsection 5(c)]</th> <th data-bbox="520 813 1129 911">Availability Assessment</th> </tr> </thead> <tbody> <tr> <td data-bbox="121 911 520 959">Less than 0.60</td> <td data-bbox="520 911 1129 959">0%</td> </tr> <tr> <td data-bbox="121 959 520 1052">0.60 to 0.80</td> <td data-bbox="520 959 1129 1052">$\frac{\text{average hourly availability} - 0.60}{0.20} \times 100\%$</td> </tr> <tr> <td data-bbox="121 1052 520 1096">Greater than 0.80</td> <td data-bbox="520 1052 1129 1096">100%</td> </tr> </tbody> </table>	Average Hourly Availability [subsection 5(c)]	Availability Assessment	Less than 0.60	0%	0.60 to 0.80	$\frac{\text{average hourly availability} - 0.60}{0.20} \times 100\%$	Greater than 0.80	100%	
Average Hourly Availability [subsection 5(c)]	Availability Assessment								
Less than 0.60	0%								
0.60 to 0.80	$\frac{\text{average hourly availability} - 0.60}{0.20} \times 100\%$								
Greater than 0.80	100%								
<p>Adjustments</p>									
<p>6 The ISO may make adjustments to the hourly availability if the generating unit or aggregated generating facility is affected by an event outside the control of the owner of a generating unit or aggregated generating facility, including but not limited to a transmission or distribution facility outage, congestion, a directive issued by the ISO or a circumstance arising under the ISO tariff or an ISO rule.</p>	<p>This appears acceptable</p>								

Question	Stakeholder Comments
Communication	
<p>7 The ISO must provide a preliminary performance assessment, along with all related input data, to the legal owner of a generating unit or an aggregated generating facility by January 31 of the year following the calendar year to which the refund relates.</p>	<p>This appears acceptable</p>
