

Cancellation of the Lone Pine Wind Farm Connection

The Lone Pine Wind Project LP. (Lone Pine) request for transmission system access to connect its proposed Lone Pine Wind Farm (Facility) in the Three Hills area has been cancelled.

BACKGROUND

In March 2024 and June 2024, Lone Pine and ATCO began distributing an information package that included the AESO's Need Overview, *Need for the Lone Pine Wind Farm Connection in the Three Hills area*. The AESO Need Overview included the following transmission developments:

- Add one 240 kilovolt (kV) transmission line, to connect the Facility to the existing 240 kV transmission line 925L in a T-tap configuration.
- Add or modify associated equipment as required for the above transmission developments.

NEXT STEPS

The above developments are no longer needed and the AESO will not submit an application to the Alberta Utilities Commission or consider this project under section 501.3 of the ISO rules, *Abbreviated Needs Approval Process*.

Information related to the Lone Pine Wind Farm Connection project is available on the AESO's website at <https://www.aeso.ca/grid/transmission-projects/>

WHO IS THE AESO?

The Alberta Electric System Operator (AESO) plans and operates Alberta's electricity grid and wholesale electricity market safely, reliably and in the public interest of all Albertans. We are a not-for-profit organization with no financial interest or investment of any kind in the power industry.

We appreciate your views, both on the need for transmission system development and proposed transmission plans. If you have any questions or comments, please contact us directly.
