

AESO AIES 2015 Transmission Bus Loss Factors
2015 Non-Binding Loss Factors - Calculated at Non Generation Transmission Buses

- | | |
|---|---------------------------------------------------------------------------------------------------------------------|
| 1 | The loss factor values listed are determined at non-generation transmission buses and are illustrative only |
| 2 | The loss factors are calculated the same as the binding loss factors but at buses with no generation |
| 3 | The loss factor calculation does not include an assessment for voltage or congestion criteria |
| 4 | For accuracy, a full study for each proposed generator would be required and the loss factor calculated accordingly |
| 5 | Please refer to the AESO facility map for Area definitions |
