Rider E Calibration Factor Calculation
For The First Quarter 2008

$$2008 \text{ First Quarter Calibration Factor \%} = \frac{[(\text{Cost of Losses} - \text{Loss Revenues}) - \text{Rider E Revenues}]_{\text{Jan 1 2006 - Dec 31 2008}}}{[\text{Hourly Loss Factor Customer Volumes} \times \text{Hourly Pool Price}]_{\text{Jan-Dec, 2008}}}$$

The following table provides a projected year-end losses account balance for Rider E for January to December 2008.

Rider E Calibration Factor Q1 2008	(0.05%)	(Refund)/Charge
---	----------------	------------------------

Notes:

1. The Rider E Calibration Factor will apply to all loss factor customers receiving service under Rates STS, DOS, EOS, and IOS as provided on the Rider E rate sheet.
2. If the Rider E Calibration Factor for Q1 remained in place during Q2, Q3, and Q4, it would collect the variance between cost of losses and revenues by the end of 2008, as currently forecasted.
3. Forecast amounts in the above table and calculation reflect the AESO's best estimates at the time of preparation. The values represent forecasts and estimates only, and final values will differ.
4. Actual amounts in the above table are subject to revision in future periods due to interim and final settlement and to other adjustments.
5. The calibration factor calculation itself is based on summing hourly costs, revenues, and loss factor customer volumes x pool price, and the same result will not be obtained by using the monthly values presented.
6. Numbers may not add due to rounding.
7. "NA" means "not applicable".
